Tuffboard

RECYCLED PLASTIC SHEETING

When you need a material that will go the distance, ask for Tuffboard. Made from 100% recycled plastic, it's great for the environment and easy to use. You can drill it, saw it, nail it, tap it or weld it.

When other materials splinter, warp or dent, Tuffboard just absorbs the punishment. Tuffboard loves to get it's feet wet - when sheet metal rusts or timber rots, Tuffboard grins... sheets can even be welded together to form a water proof barrier. The uses are limitless.
If it's a tuff job, you need Tuffboard.

- Animal pens
- Signs
- Under feed barriers
- Lining truck sides

The sheet is of particular value in marine environments or other damp/wet areas.

It is not suitable as a flooring material for humans or animals due to the risk of slip.

The sheet comes in standard sizes of
2440 x 1240 x 6 mm Weight 17kg
2440 X 1240 X 9mm Weight 25kg
2440 X 1240 X 12mm Weight 34kg
Colour is black and is patterned on one side.
