

Recycling

Dear Valued Customer

We would like to inform you that during 2015 you will see a change with our bags as we start to introduce new packaging technologies. Our new innovative packaging will help us to improve the quality, consistency and longevity of our product and will also help detract vermin from damaging the product. We see this change as another step forward in improving product quality and improving the Fiber Fresh customer experience.

In the coming months you will notice that the package has slightly changed with the most obvious difference being an internal silver lining and we will no longer use an inner liner bag.

The bags are recyclable as recycling Grade 7 – Miscellaneous.

This plastic material is recyclable through the Plasback Recycling Scheme. Please keep all Fiber Fresh packaging in a separate Plasback recycling liner.

If you have any further questions please contact Plasback they will be more than happy to assist.

Fiber Fresh thank you for your on-going support.
