

WE RECYCLE SCRAP PLASTICS AND MAKE TUFFBOARD FROM IT...

Tuffboard
RECYCLED PLASTIC SHEETING

This is 9mm Tuffboard in use. This horse float belongs to a customer of Agpac's and the Tuffboard has been used as a plywood replacement. Tuffboard size is 1.2m X 2.4m X 9mm and is manufactured in Auckland using some of the Plasback recycled silage wrap.

Tuffdeck
THE NONSLIP SOLUTION

Tuffdeck is a long lasting no-maintenance tile for creating low cost, non slip surfaces in wet or slippery areas such as animal and machinery sheds, wash-down bays, walkways and stairs etc. Tile dimensions 1200 X 400 X 40mm. Each tile covers .48 sq m

Plaswood

Plaswood - a wood alternative! Made from UK recycled bale wrap. Plaswood's high strength and durability as well as zero maintenance makes it an ideal wood substitute for the urban environment.

Tuffboard
RECYCLED PLASTIC ROLLS

Tuffboard is also available in roll form. Tuffboard rolls are a versatile thin sheet with the same strength and hygienic properties as Tuffboard sheet. Ideal for use in deer barns and other areas where only a clean surface skin is required.

COLLECTION

We also collect irrigation pipes and tree guards. Irrigation pipes should be rolled and tied for transport. Tree guards should be stored in Plasback liners.

To send a large quantity of 20 litre drums stack on a pallet and shrink wrap and mark the pallet as "Rinsed containers". Pallet has 80 x 20 litre drums in four layers of 20 drums.

ON FARM COLLECTION OF AGRICULTURAL PLASTIC WASTES

Plasback was accredited in 2010 and 2017 by the Minister for the Environment under the Waste Minimisation Act.

RECYCLING SOLUTIONS FOR FARMERS

BALE WRAP AND SILAGE SHEET RECYCLING

1 Place the liner in the bin and ensure there is plenty of overhang to tie the liner on when filled.

2 Remove bale wrap and silage sheeting placing immediately in liner.

3 By filling the liner daily with bale wrap and silage sheeting, contamination is greatly reduced.

4 Tie off the filled liner, remove from the bin, set aside for collection. (Up to 200 round wraps per liner)

5 We do not collect nets.

6 Bins and liners are available via Plasback and farm merchants.

THE COLLECTION CHARGE IS \$40 PER LINER

POLYPROPYLENE BAG RECYCLING

- Woven Polypropylene bags.
- Please keep the small Polypropylene bags and the large tonne Polypropylene bags separate from Stream 1.
- Use a tonne PP bag as an outer carrier bag and put other LARGE tonne and half tonne bags into that outer bag.
- Keep all small bags separate in a Plasback liner. Please only send Polypropylene bags. Any bag with silver foil or mixed plastics or paper bags are not accepted.

THE COLLECTION CHARGE IS \$40 PER LINER

VINEYARD NETS

EMPAK

- Plastic, wooden, paper cores, stakes or battens to be removed
- No contamination of wire, rope or foreign objects
- HDPE Monofilament nets to be separated from Polypropylene tape products
- Black & White Nets can be mixed.

COLLECTION CHARGE APPLIES
